About Sharp Branding

Sharp Branding is a design and print studio that makes brands impossible to miss — shaping how a business looks, then putting it on show with high-impact print, signage and display, from concept to completion and at any scale. Every product is manufactured in the UK through our network of trusted print partners, with quality control on every order.

UK-Sourced Quality

Every flag and banner is manufactured in the UK through our network of trusted print partners, with quality control on every order.

Competitive Pricing

Trade pricing on a focused, well-understood product range, without compromising on quality.

Reliable, On-time Deliveries

Every order lands on the date your project depends on — vital when a site schedule or an event date can't move.

Fast Issue Resolution

Problems handled quickly and without drama — because a delay never just costs us, it costs someone else's day.

Housebuilder Sites

We work alongside signage contractors delivering flags and site fencing for new-build developments — specced to the site and delivered to the install timeline your development depends on.

Events

We work directly with event organisers — crowd barriers and flags for marathons, triathlons and cycling events, planned around dates that can't move.

Car Dealerships

We work directly with dealership forecourts — forecourt flags and branding built to get a frontage noticed.

How to use this brochure — the pages that follow group our range by product and by the kind of work it's built for, to help you explore the range. Full pricing for every product and size is in our companion price list. Get in touch for a copy, or to talk through a project.

Feather Flags

Our best-selling single-pole flag shape — sharply visible from every angle, in kit or replacement-graphic form, across four pole heights and available in single or double-sided options. Digitally printed onto 115gsm knitted polyester, hemmed all round with a pole sleeve. Other flag shapes also available on request.
